Series, Biological Wastewater 3th, 2024 Biological Wastewater Treatment Processes II: MBBR Processes Biological Wastewater Treatment Process. That is, the microorganisms that carry out the treatment are attached to a solid medium, as in trickling filter or RBC systems. By contrast, in a suspended growth biological wastewater treatment process, like the activated sludge process, the microorganisms that carry out the treatment are kept in suspension.

Discrete Stochastic Processes, Chapter 2: Poisson Processes The counting process $N(t)$ for each $t > 0$ are then defined as the number of arrivals in the interval $(0, t]$. $N(0)$ is defined to be 0. Thus, for the Bernoulli process with an increment size of 1, $N(n)$ is denoted as S_n in Section 1.3.

3th, 2024. 1 Poisson Processes, and Compound (batch) Poisson Processes Theorem 1.1 Suppose that ψ is a simple random point process that has both stationary and independent increments. Then in fact, ψ is a Poisson process. Thus the Poisson process is the only simple point process with stationary and independent increments. The practical consequences of this are discussed in Section 1.3.
