Functions Computation Being Ineffective For All But The Simplest Parameter And Variable Ranges. We Focus In This Dissertation On Computing The Two Most Commonly Used Hypergeometric Functions, The Confluent Hypergeometric Function ${}_1F_1(a;b;z)$ And The Gauss Hypergeometric Function ${}_2F_1(a;b;c;z)$, Which Both Suffer From These Problems. Hypergeometric Functions, How Special Are They? Our Special Points Was To Be Found, Together With Their Domain Of Convergence. In This Process, The Conceptual Understanding Of These Generalizations Lagged Far Behind The Well-developed Ideas Around Gauss's Hypergeometric Function.
